Hub

## Container and freight terminal

**Container and freight terminal** enables servicing of block train formed from container platforms or freight wagons. For six-hour reloading slots, the terminal's daily capacity is four trains per day.

Container transshipment is carried out at the terminal using reach stackers. Commodity logistic operations are carried out using six overhead cranes with a lifting capacity of 8 up to 25 tons and forklifts with a lifting capacity of up to 10 tons.

**Terminal** has:

- own siding of 1619m usable track length located at the Lodz Zabieniec cargo rail station
- Kalmar reach stacker. Three machines of lifting capacity 45t each.
- own shunting locomotives to make maneuvers at the siding

**Centrostal** has a second own siding with a usable track length of 400m, equipped with an external ramp and a reloading rail track in the warehouse hall where handling operations can be carried out using an overhead crane with a lifting capacity of 42 ton.

## Container Depot

### Storage, Maintenance & Repair, IT Support

**Container depot** offers complex services of storage maintenance and repair provided by Centrostal Łódź in Łódź at Brukowa 24.

## Forwarding

by Car, by Rail, by Sea, by Air

**Centrostal** is a certified forwarding agent of goods.

**Centrostal** guarantees its clients efficient provision of forwarding services. At every stage of order implementation, our clients are supported by a group of experts. By using our own warehouse and handling infrastructure, we are able to provide comprehensive services for the supply chain, in particular for container freight (FCL and LCL) shipments, as well as truck (FTL and LTL) shipments.

We organize domestic and international road transport in Europe. In case of container loads, we offer comprehensive multimodal transshipment services on sea and railway routes, including the China-Europe route, both for import and export. We offer our customers consultations at every stage of the forwarding process. We provide consulting services on the organization of transport in export and import.

**Centrostal** provides services under Polish General Forwarding Rules (OPWS 2010) and applicable European regulations.

## Warehousing of Oversized, Palletized and Customs Goods

**Centrostal** offers warehousing of goods for various industries. We offer short and long-term warehouse contracts, combining them with a comprehensive handling, transshipment and distribution offer. The security of the deposited goods is ensured by monitoring systems and physical protection of the facility. Property and general liability insurance policies for the shipper constitute additional guarantee. Warehousing is complemented with the following services:

- completion
- confectioning
- palletizing and repackaging
- labelling

Thanks to diversified warehouse spaces, we can offer storage of palletized goods, big bags, metallurgical goods, including steel coils, as well as machines and equipment. Our transport equipment enables handling of logistics objects weighing up to 42 tons.

Our warehouses are characterized by a high level of security and the storage process is coordinated by qualified personnel in accordance with individual customer needs.

**Centrostal** offers a temporary storage service for imported goods, allowing customs and tax duties to be suspended for up to 90 days.

**Centrostal** has separated storage spaces for phytosanitary inspections.

## Handling of Multimodal, Specialized and Palletized Cargo

**Centrostal** offers a wide range of transshipping and handling services with the use of various technical infrastructure and railway sidings. We offer both the simplest cross-dock services and transshipment of heavy and oversized cargo, metallurgical products, machines and equipment, crates, etc. We specialize in handling cargo between semi-trailer and container or vice versa. Our staff has appropriate qualifications and many years of experience, which guarantees proper stowage of goods in container units. We provide our customers with load balancing performed with the use of modern software.

We undertake tasks even the most demanding clients.

**Centrostal** provides to its clients a comprehensive service of transshipping, handling and distribution of goods delivered by rail transport. Our warehouse infrastructure allows for unloading at the warehouse halls and for direct storage in the area of the storage racks.
